Creating Application Job Catalog Entries

Context

You can create an application job catalog entry in the ABAP development tools for Eclipse using the creation wizard.

Procedure

1. You can start the wizard to create a new object from the main menu: **File > New > Other**. Select **ABAP - Application Job Catalog Entry**. For more information, see [Creating Development Objects](#)

The creation wizard is opened.

New Application Job Catalog Entry

Application Job Catalog Entry
Create Application Job Catalog Entry

Project: * DEMO **Browse...**

Package: * \$DEMO **Browse...**

Add to favorite packages

Name: * Z_DEMO_CATALOG_ENTRY

Description: * Catalog Entry of CL_APJ_DEMO_CLASS

Original Language: EN

Class with Execute Method: * CL_APJ_DEMO_CLASS **Browse...**

Navigation: < Back, Next >, Finish, Cancel

Creation Wizard for Application Job Catalog Entry

2. In the wizard, fill the **Project** and **Package** if they are not already filled.
3. Enter the **Name** and the **Description** of the new application job catalog entry.
4. Enter the name of the ABAP class that contains the method EXECUTE that is run within the job. The class should use the interface IF_APJ_RT_RUN.
5. Select **Next**.

6. Assign a transport request.

7. Select **Finish**.

Results

The new application job catalog entry is created and opened in the **Application Job Catalog Entry Editor** for editing.

Application Job Catalog Entry: Z_DEMO_CATALOG_ENTRY
